QuickPlate — Responsive High-Fidelity UI Component System

Internship Task 3

1. Task Overview

Objective: Scale the low-fidelity frameworks from Task 2 into visually dynamic, high-fidelity UI designs for the QuickPlate meal delivery app.

- Convert the Task 2 wireframes into polished, high-fidelity interactive screens.
- Establish a clean, consistent typography system.
- Define strict design tokens (color, spacing, sizing, etc.).
- Build interactive asset components: buttons, input fields, and dropdown menus.
- Ensure contrast ratios are fully compliant with WCAG accessibility principles.

2. Typography System

A single type family is used across the app, scaled to a consistent hierarchy so headings, body copy, and UI labels stay legible and visually unified on every screen.

- H1 / Screen Title – 24px, Semibold
- H2 / Section Title – 18px, Semibold
- Body – 14px, Regular
- Caption / Helper Text – 12px, Regular
- Button Label – 14px, Medium, all-caps tracking +0.5px

3. Design Tokens

Color tokens:

- Primary (brand/accent) – used for primary buttons and active states.
- Secondary – used for secondary actions and highlights.
- Surface / Background – base screen and card backgrounds.
- Text Primary / Text Secondary – main and muted text colors.
- Success / Warning / Error – status and feedback states (e.g. order tracking).

Spacing & sizing tokens:

- Base spacing unit: 4px, scaled as 4 / 8 / 12 / 16 / 24 / 32px.
- Corner radius: 8px (inputs, buttons), 16px (cards).
- Touch target minimum: 44 x 44px for all interactive elements.

4. Interactive Components

- Buttons – primary, secondary, and disabled states, each with a defined hover/press style.
- Input Fields – text fields with default, focused, filled, and error states (used for login, search, and checkout forms).
- Dropdown Menus – used for diet/price filters and quantity selection, with open and selected states.

5. High-Fidelity Screens

The seven Task 2 wireframe screens were converted into high-fidelity, interactive screens using the design tokens and components above:

- 01 Login
- 02 Home
- 03 Restaurant Menu
- 04 Item Detail
- 05 Cart
- 06 Checkout
- 07 Order Tracking

6. Accessibility & WCAG Compliance

All text and interactive-element color pairings were checked against WCAG 2.1 contrast guidelines: a minimum contrast ratio of 4.5:1 for normal body text and 3:1 for large text and UI components, so the interface remains legible for users with low vision or color-vision deficiencies.
